

Databases

What is a database?

The library databases are online collections of journal articles and other documents on various subjects.

Where can I find them?

You will find them on the library website <http://library.gmit.ie>

- Most of the library databases are searchable using the Multisearch search box on the library website. That's the first search box you see. When you find the article or document you want, click on its title. This will bring you into the database where you can view or print the article.
- You can also use the [databases](#) link on the library website to go directly to a specific database.

Which databases should I search?

These are some of our most popular databases. The ones marked with this symbol  are searchable using the Multisearch search box on the library website.

This means that you can search more than one database at a time.
